## Uncompromising Quality

Woodway's high standards resonate with professional contractors throughout the United States. Our original philosophy of putting quality above all other considerations when designing products has earned us a nationwide reputation as designers and manufacturers of superior wood products for the home and garden.

## The Commitment Continues

Woodway is dedicated to seeking out sources of high-quality lumber grown and harvested using sustainable, environmentally responsible forestry practices. As a measure of this commitment, Woodway has made efforts for nearly a decade to source lumber that is third-party certified as being managed and harvested in an environmentally responsible fashion.

## Environmental Sustainability

Western Red Cedar (WRC) is the primary species used in Woodway products. The species offers proven environmental sustainability in addition to bringing warmth, longevity, and authenticity to any project. WRC has the lowest environmental impact when compared to other materials, such as brick and fiber cement. Studies have shown WRC to be a carbon-neutral component of the construction process, which helps projects achieve a wide range of certification goals. The environmental benefits have been recognized by the USDA and other independent bodies. The species is harvested from managed forests in the Pacific Northwest US and British Columbia.

## Warranties

Woodway provides warranties ranging from 1 to 20 years on its products, ensuring that products will be free from defects in material or workmanship - if finished and installed according to the manufacturer's instructions. The following warranties apply: Lattice - 20 years; Post caps - 1 year. For more details on warranties, please visit our website - www.woodwayproducts.com.

## No Callbacks

The bane of the contractor's existence: callbacks. Nobody likes them. They cost time, money and are a hassle. You do not want them. We do not want them. We understand your needs and we build our products with "No Callbacks" in mind.

# CONTENTS

**WOODWAY**®

# The Greenest of the Green

Building product manufacturers have long been touting their green credentials; shooting off quick stats, reciting well-rehearsed sound bites and doing their best to generate buzz in the hope that their product will be elevated to that ideal state associated with hybrid cars and programmable thermostats.

Here at Bowers Forest Products, we approach environmental sustainability differently. If you have had the chance to get to know us, you will surely agree that our approach to the environment is just about as trendy as our office dress code. There are few sound bites used by our salespeople, fewer press-releases with green headlines.

Our approach to the environment stems, instead, from our love of the outdoors and our respect for all that is natural. This appreciation of the natural world, combined with an independent spirit, is a guiding element in everything we do.

Lately, we have been asked by customers to jump on the bandwagon and proclaim our 'green-cred' a bit. After a little apprehension, we capitulated to their requests. Here are a few areas in which Bowers Forest Products contributes to a healthier planet.

**Biofuels:** Bowers Forest Products has generated more than 20,000 tons (BDT) of biofuel from wood waste over the past ten years. The vast majority of our total wood waste is reused for heating, drying and as an alternative to fossil fuels in generating electricity.

**Recycling:** In addition to our company-wide recycling program, we have donated sawdust and chips for use as mulch in re-vegetation projects and in a single year we sold 137 tons of wood particles for use as compost and playground chips.

**Fewer VOC's:** We use very few volatile organic compounds, which is good news for our nearby rivers and local water supply. Over 90% of our finishing treatments and most of our adhesives contain little or no VOC's.

**Material Recovery:** Our entire cutline operation serves to recover usable wood from material that is otherwise under-utilized. Many of our products incorporate material from this process.

# LATTICE

Quality lattice is Woodway's most renowned product. We recognize our contractors value durability. Woodway Lattice is opposed-angle stapled for maximum wood-holding contact and the angle is reversed at alternate lath intersections.

Fasteners in Clear grade Cedar, Mahogany, and #1 Treated are glue-coated stainless steel; all other grades use 18 gauge, electroplated, galvanized and glue-coated steel fasteners to resist rust and improve holding power. Fasteners are set flush or slightly countersunk, parallel to the wood grain and their points do not protrude through the face. In addition, all 4' wide panels are glued along at least four joint lines with industrial adhesive to improve panel integrity and strength.
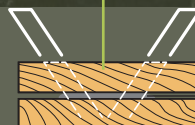

Woodway's refusal to compromise and a continued emphasis on putting quality ahead of other considerations has paid off. Woodway Lattice is the best-selling premium grade lattice in the United States.
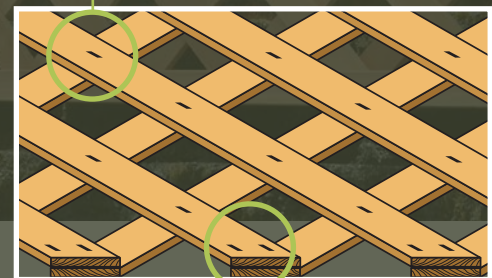

ADD A NEW DIMENSION TO YOUR PROJECTS WITH WOODWAY LATTICE, THE INDUSTRY STANDARD FOR QUALITY.

30° angle double stapling provides extra strength at edges

strategically glued for ultimate stability

# Lattice Grades

## Choose the Lattice for Your Project

Woodway Lattice is available in Clear, No. 1, and Select grades and a variety of wood species. Western Red Cedar, Redwood and Mahogany lattice offer natural rot and pest resistance.

CA-C is also offered in numerous styles. Most styles of Woodway lattice are sold in 4' x 8' sheets, while smaller sized sheets are also available. See the SKU table on page 8 for specific offerings.

## Clear Grade

The finest wood lattice on the market. Our Clear grade lattice is made entirely of smooth-sawn clear lath. An occasional bird's-eye or pin knot is permitted, but no holes, wane, splits, or stains are allowed. These panels are assembled with gel-coated stainless-steel fasteners to eliminate rust stains.

*Range of Acceptable Wood*

*Clear Grade Lattice*

## No. 1 Grade

Made of carefully pre-graded, smooth sawn lath to ensure fine appearance and consistently well manufactured, durable panels. These lattice panels contain a proportion of clear lath, but allow sound knots and other minor wood defects. These panels are assembled with glue coated galvanized fasteners. A stainless steel upgrade is available with an additional charge.

*Range of Acceptable Wood*

*No. 1 Grade Lattice*

## Select

A structurally sound lattice, made of pre-graded lath, which may have some characteristics that make it unsuited to installations where top appearance is a major factor. Does not permit characteristics that would significantly reduce structural integrity. This is the grade of lattice most seen in building materials outlets where the price is promoted. This grade of lattice is tagged without the Woodway logo.

WOODWAY

# Patterns & Spacing

## Classic Lattice

No job or application is ever the same. Spacing needs, lighting control, and design preferences vary from project to project. Whether you need privacy or garden spacing in square or diagonal design, Woodway Classic Lattice has you covered.

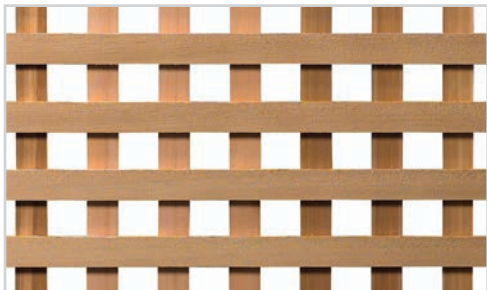

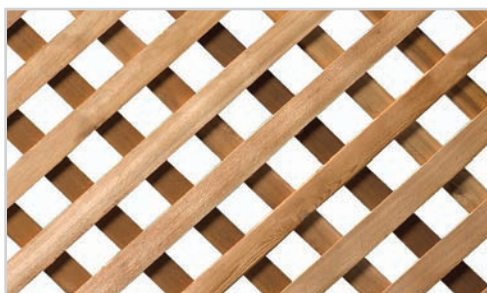

### Square Privacy Lattice
1 ½" lath width (+/- ¹⁄₁₆"),  • 1 ¹⁵⁄₁₆" nominal openings (+/- ⅛")

### Square Garden Lattice
1 ½" lath width (+/- ¹⁄₁₆"),  • 2 ½" nominal openings (+/- ⅛")

### Diagonal Privacy Lattice
1 ½" lath width (+/- ¹⁄₁₆") • 1 ⅞" nominal openings (+/- ⅛")

### Diagonal Garden Lattice
1 ½" lath width (+/- ¹⁄₁₆") • 2 ¾" nominal openings (+/- ⅛")

## Estate Lattice

Now and again, you will get a job that calls for something unique in the way of lattice. Our Estate Lattice might be just the solution. These elegant, classical, and enduring patterns – all made with stainless steel staples – add distinction to any project, indoors or out.

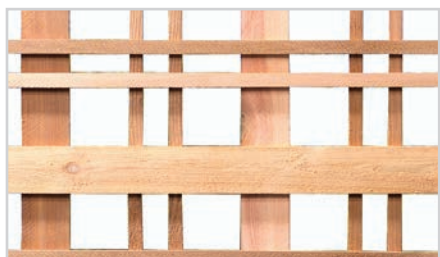

### Monterey
Lath widths: 2 ½" (+/- ¹⁄₁₆") large lath, ¹¹⁄₁₆" (+/- ¹⁄₁₆") narrow lath. Multiple opening sizes.

### Catalina
Lath widths: 2 ½" (+/- ¹⁄₁₆") large lath, ¹¹⁄₁₆" (+/- ¹⁄₁₆") narrow lath. Multiple opening sizes.

# Installation

We recommend securing lattice into a framed opening, using our mouldings (or sandwiching with 3/4" stop) and a bead of construction adhesive. Local codes must be followed particularly regarding railings on porches, balconies, and stairs. Heavy Duty lattice is recommended for such installations.

It is recommended that finishes be applied prior to installation as the numerous openings and intersections of lath make coating application difficult once the panels are in place. Coatings should be applied early to minimize the effects of weathering. Cedar lattice will achieve a natural silver patina if left unfinished. Visit **www.fpl.fs.usda.gov** (Forest Products Laboratory) for more information.

# Specification Writing *Quality at Every Angle*

Lattice shall be Woodway Quality Lattice, as manufactured by Bowers Forest Products, or equal. Lattice shall be graded based on the Western Wood Products Association Lath Grading Rules, consisting of Clear grade, made entirely of smooth-sawn, clear lath, with glue-coated stainless-steel staples or stainless-steel brads, or No. 1 grade, using electroplated, galvanized, glue-coated staples, made from smooth-sawn lath, allowing sound knots.

Lattice shall have lath fastening, augmented by at least four (4) lines of industrial gluing. All lattice shall have alternate, opposed-angle stapling, set parallel with the wood grain, or be fastened with stainless steel brads. Panel edges are opposite, double-angle fastened, and panel ends are double fastened. One panel face shall be free of visible fasteners.

# Mouldings

| Moulding | Moulding Profile | SKU | Lattice Compatibility | Nominal Size | Inner Groove Dimensions (net width & depth) |
|---|---|---|---|---|---|
| Cap | | Cedar - 815.1625 | Standard | ¾" x 1½" x 8' | ½" x ½" |
| Heavy Cap | | Cedar - 815.1640 | Heavy Duty | 1½" x 1½" x 8' | ⅞" x ½" |
| Heavy Divider | | Cedar - 815.1645 | Heavy Duty | 1½" x 1½" x 8' | ⅞" x ½" |

# Style & Function Prominently Aligned

*Create privacy and space definition. Applications include deck, patio screening, interior room separation, and fencing.*

## Highland Park

The first extension to our panel screen line. Much like our popular Moderna panel, the Highland Park features prominent directional lines, heavy-duty, kiln-dried and rot- resistant Western Red Cedar. Glued and stapled at every intersection with stainless fasteners for maximum strength and durability, the Highland Park panel is perfect for privacy screening, space definition for outdoor living, decks, patios, fencing and more.

## Moderna

Moderna Panel Screen remains a popular alternative to traditional lattice - both as deck and patio screening, as well as unique outdoor living area definition. Cedar and Mahogany Moderna Panels use clear fiber.

### FEATURES

- Privacy screening with aesthetic appeal
- Space definition for outdoor living, deck, patio, fencing and more
- Heavy-duty, kiln-dried Western Red Cedar and Mahogany
- 100% glued and stapled intersections
- Interior/exterior use
- Stainless steel fasteners
- Naturally rot-resistant

# Versatility

## *Imagine the Possibilities*

Woodway Post Caps are both decorative and protective, preventing decay by shielding the post tops from the elements.

Sturdy, handsome post caps capture the design sophistication and attention to detail that exemplifies the classic architecture. Choose from stylish metal, wood, glass, and solar designs in a variety of styles. Woodway Post Caps are built to last. We use premium-grade, kiln-dried Western Red Cedar, Mahogany, and treated Hem-Fir.

# Quality to the Core

## *We Take No Shortcuts in Making the Finest Post Caps*

Woodway Post Caps add a finished quality to a variety of outdoor projects. Whether it is a copper-clad top for your mailbox post, cedar pyramid caps for your picket fence posts or cedar ball finials for the fence, Woodway finishes your project with style. Add a crowning touch to your fences, railings, and posts with Woodway's elegant post caps. Choose from stylish metal, wood, glass, and solar designs in a variety of styles. Woodway Post Caps are built to last. We use premium-grade, kiln-dried Western Red Cedar, Mahogany, treated Hem-Fir, and Redwood.

Our blocks and trim skirts are precision-molded for uniformity. Rabbeted joinery in our wood and select metal caps provides extra strength and durability. Our glass caps are solid formed for longevity.

*Your next project deserves Woodway.*

*\*Woodway post caps are not recommended for composite, treated, or PVC posts. For best results, Woodway post caps should be installed on nominal sized posts*

*All metal-clad caps are supported by a hidden, synthetic base for dimensional stability.*

# Glass Post Caps

The deep, rich colors of Woodway's Glass Post Caps will last for generations in the harshest of weather conditions. Made of 1/4" heavy-duty glass, they capture and reflect the daylight and transform ordinary posts into works of art. Add color to your yard and garden with the radiant beauty of real glass. Woodway Glass Post Caps add elegance to deck, porch, or fence posts – even raised garden bedposts. However, you use them, they will finish off your outdoor design with flair. The stunning glass post caps lend design sophistication and colorful appeal to your outdoor living spaces.

Choose from an array of colors: cobalt blue, amber, forest green, and opaque black. Each pyramid-shaped cap will enhance your decor with colors chosen to complement the most contemporary and traditional home color schemes. No matter which size or color post cap you choose, you will be eager to show off your elegantly coordinated outdoor environment. Add your own lighting to our amber, forest green, or cobalt blue glass for extra effect. *Not Recommended for Composite, Treated, or PVC due to possible swelling of the post and potential breaking of the glass. For best results, glass post caps should be installed on nominal sized posts.*

# Wood/Metal Post Caps

### Wood Post Caps

Wood post caps from Woodway are both decorative and protective, preventing decay by shielding wood post tops from the elements. Add that finishing touch of class to fences, lamp posts, mailbox posts, and deck railings with our wide variety of post caps.

### Metal Post Caps

Add a crowning touch to your fences, railings, and posts with Woodway's elegant metal post caps. Choose from stylish copper-clad designs in natural finishes. Your Woodway metal post caps are available with a variety of wood bases, including Cedar, Redwood, Mahogany, and Treated.

*Above:*
Copper Pyramid Post Cap

# Solar Post Caps *Decorate & Illuminate*

Woodway is raising the bar for solar lighting. The Solar Post Cap features an LED bulb for widest light coverage coupled with a German-made amorphous solar panel for improved charge capability. This post cap is molded from synthetic solid material throughout with an attractive finish layer for minimal scratch visibility. The lamp enclosure is crystal clear synthetic material, unlike competing post caps which use a textured plastic. The result is a beautiful statement, day or night, in any outdoor setting.

**FEATURES**

- **Wide area light coverage**
- **Energy savings from clean, green solar energy**
- **German-made amorphous solar panel that charges even on cloudy days**
- **Electroplated finish**
- **Competitively priced**

## Wood Post Cap Construction

- Premium clear Cedar, Redwood or Mahogany
- Rabbeted joinery for extra strength
- Weatherproof industrial glue
- Precision molded for greater uniformity
- Fits standard post
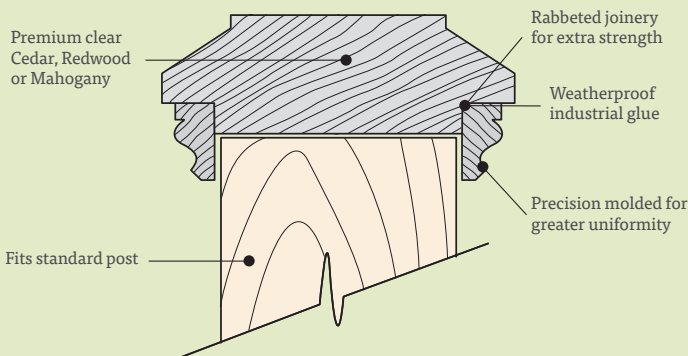

## Wood Finishing Instructions

Wood expands and contracts across the grain. To reduce this naturally occurring tendency and prevent potential problems, finish your post caps prior to installation.

**Stain Finishing:** Immerse wood portion of the cap in quality exterior, penetrating oil, such as Penofin or Cabot's Australian Timber Oil. It is necessary to finish both inside and outside of the cap. Follow the coating manufacturer's directions.

**Paint Finish:** Prime inside and outside of wood cap with alkyd, oil-base primer, or stain-blocking acrylic primer. Finish cap with exterior, alkyd oil or acrylic house paint. Two final coats are best.

# Fencing Products

## Toppers

Fence toppers feature sturdy Woodway lattice, sandwiched on the top and bottom between nominal 1" x 2" moulding. The 1' x 8' lengths are offered in several patterns and grades.

| Category | Product | Dimensions | SKU |
|---|---|---|---|
| | HD Select Privacy Diagonal | 1' x 8' | 940.1018 |
| Toppers | HD #1 Privacy Square | 1' x 8' | 940.1482 |
| | Clear Catalina | 1' x 8' | 940.1483 |
| | Clear Moderna | 1' x 8' | 940.1484 |
